- HTML, Javascript, CSS, and HTTP background

Additional Skills:

- Understanding of IBM Mainframe technology
- z/VM Operating System knowledge, especially CMS and included tools/utilities
- IBM Assembler Language
- PL/I Language
- Linux scripting and technologies
- IBM z/OS and z/VSE Operating System basic knowledge

About Velocity Software

Velocity Software was founded in 1988 to create the premier performance products for the z/VM platform.

z/VM system performance was Velocity Software's singular commitment for many years. With the introduction of Linux running in a z/VM environment and the proliferation of Internet and networking activity, Velocity's view of performance measurement and management has expanded to include Linux, the network and applications running under Linux on IBM Z.

With customers ranging from Fortune 500 companies to smaller installations, Velocity Software can help with any z/VM or Linux on IBM Z performance problems.

Velocity Software is a privately held company, headquartered in Mountain View, California with offices in Germany, Ohio, Texas and Wisconsin.
